Md. Thohedul Islam

Dhaka, Bangladesh · Remote Worldwide

Senior Full-Stack Engineer & Systems Architect

emonislam79799@gmail.com | [REPLACE: +880 1XXXXXXXXX] | emonislam.dev | github.com/[REPLACE: emonislam] | linkedin.com/in/[REPLACE: thohedul-islam]

PROFESSIONAL SUMMARY

Results-driven Senior Full-Stack Engineer and Systems Architect with 5+ years of production experience building high-throughput distributed systems, real-time web applications, and resilient cloud infrastructure. Specialized in Go, Node.js, React 19, TypeScript, and Kubernetes, with a focus on sub-millisecond API latency, fault-tolerant microservices, and pragmatic generative AI integrations supporting over 1.4M daily requests at 99.98% SLA availability.

CORE TECHNICAL SKILLS

Frontend Architecture: React 19, TypeScript, Next.js, Vite, Tailwind CSS, State Management (Zustand, TanStack), Web Performance & Core Web Vitals, HTML5 Canvas, WebAssembly

Backend & Distributed Systems: Go (Golang), Node.js, Express, PostgreSQL, Redis & Pub/Sub, gRPC, REST APIs, GraphQL, WebSockets, Event-Driven Architectures

Cloud, DevOps & Observability: Docker & Containerization, Kubernetes & Helm, Google Cloud Platform (GCP), AWS, CI/CD (GitHub Actions), Linux Administration, Prometheus, Distributed Tracing

AI Systems & Tooling: Gemini API & LLM Tool Calling, Vector Embeddings & RAG Pipelines, Structured Outputs, Streaming Telemetry, Python (FastAPI, NumPy)

WORK EXPERIENCE

Lead Full-Stack Engineer

2023 — Present

AeroSphere Systems

Remote · Singapore / Dhaka

- Architected an event-driven Go and WebSocket telemetry aggregation engine processing 12,000 active aircraft events per second with sub-4ms P99 latency.
- Led a squad of 6 engineers migrating legacy monolithic control portals to modular React 19 micro-frontends, reducing initial page load times by 48%.
- Implemented automated multi-cluster Kubernetes canary deployment pipelines across GCP and AWS, establishing zero-downtime rollouts and automated rollbacks.
- Engineered an edge caching tier and Redis cluster topology that reduced database load by 64% during peak operational surges.

Senior Software Engineer

2021 — 2023

Veloce Digital Labs

Remote · London, UK

- Built an edge-cached headless commerce platform processing over $8.5M in seasonal transaction volume with zero service outages.
- Designed real-time asynchronous fraud detection queue using Redis Streams and Go workers, preventing $140K in unauthorized charges.
- Established end-to-end automated testing and strict WCAG 2.2 AA accessibility standards across customer-facing checkout flows.
- Mentored 4 junior engineers in concurrent Go patterns, clean TypeScript interfaces, and optimistic UI synchronization.

Full-Stack Developer **2019 — 2021**

Nexus Spark Studio Dhaka, Bangladesh

- Delivered 14 enterprise web applications from conception to production on schedule, achieving an average client CSAT rating of 9.7/10.
- Refactored legacy database schemas and indexes, reducing complex analytical query execution time from 8.2s to under 640ms.
- Built reusable component libraries and RESTful services adopted across 8 international client products.

SELECTED PROJECTS

Nebula Cloud Orchestrator **3.8ms P99 Latency · 45k rps**

Role: Lead Architect | Tech: Go, TypeScript, Kubernetes, gRPC, React 19, Prometheus

- Constructed multi-region Kubernetes control plane streaming live node degradation metrics over bidirectional WebSocket connections.
- Developed automated pod reallocation heuristics that eliminated cluster cold-starts during unexpected ingress spikes.

Synapse AI Workflow Canvas **-72% Pipeline Debug Time**

Role: Creator & Lead Developer | Tech: TypeScript, React 19, Tailwind CSS, Vite, FastAPI, WebAssembly

- Designed virtualized infinite node canvas supporting 500+ simultaneous multi-agent LLM pipeline blocks with streaming token inspection.
- Implemented deterministic evaluation scoring and fallback routing with human-in-the-loop review nodes.

EDUCATION

Bangladesh University of Engineering and Technology (BUET) **2016 — 2020**

Bachelor of Science in Computer Science and Engineering Dhaka, Bangladesh

Honors: Dean's Honor List · Magna Cum Laude · Algorithms & Systems Focus

CERTIFICATIONS

Google Cloud Certified Professional Cloud Architect 2024

Google Cloud · Credential ID: GCP-PCA-98214

AWS Certified Solutions Architect – Associate 2023

Amazon Web Services · Credential ID: AWS-SAA-44910

Certified Kubernetes Administrator (CKA) 2023

Cloud Native Computing Foundation (CNCF) · Credential ID: CKA-88301
